## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 64-86 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 14, 2005. It is noted that claims 64-86 have been cancelled.

### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 3637

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 87-101 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,745,535 in view of copending Application No. 09/660,649. The claims of the '535 patent, teach applicant's inventive claimed sheathing including a first polystyrenic foam layer, a second polymeric scrim layer, a third impact polystyrene layer, a fourth impact polystyrene layer, first and second adhesives and a fifth polypropylene layer. The claims of the '535 patent further teach the respective positioning of the layers relative to each other within the sheathing. The '535 patent does not disclose that the second scrim layer includes first, second, and third portions each having machine direction scrim count numbers and transverse direction scrim count numbers. The '649 application is cited for the claimed aspects of the second scrim layer.

This is a provisional obviousness-type double patenting rejection.

### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Application publication to Nordgren et al., 2005/0247023, and Patents to Klaff, Robinson and Schlecker describe layered fabric structures.
